Professional Summary

Driven Software Engineer with a strong foundation in full-stack web development, software testing, and automation. Proficient in building performant and maintainable web applications using modern frameworks like Next.js, React, and Tailwind CSS. Experienced in both team-based and freelance development, delivering client-ready solutions with a focus on clean code and user experience. Seeking to contribute to impactful software products in a full-time engineering role.

Skills

Languages: JavaScript, TypeScript, C#, C++, SQL

Frontend: React, Next.js, Tailwind CSS, HTML, CSS

Backend: Node.js, ASP.NET Core Web API, .NET

Database: PostgreSQL, SQL Server

Testing & QA: Postman, WebDriverIO, Manual Testing, Automated Testing

Tools: Git, GitHub, JIRA, Docker, Azure

Concepts: OOP, REST APIs, Agile, CI/CD, Debugging, Code Review

Projects

- Space Chicken Restaurant Website (Freelance): Designed and developed a fully responsive, modern landing page using Next.js and Tailwind CSS. Integrated order links and embedded menu; deployed with custom domain.

- Data Extraction Tool for Nuricon Oil Company (Freelance): Built an automation tool to extract structured data from PDFs and output it into CSV, reducing manual entry by 80%.

- Expense Ease (Budget App): Full-stack app with React, ASP.NET Core Web API, PostgreSQL, and features like login, budgets, and transaction tracking.

- Focus Craft (Project Management App): Kanban-style tool built with React frontend and ASP.NET Core Web API backend.

- Peace Pulse (Spiritual Connectivity App): App to track prayer habits and access spiritual content with ASP.NET Core backend.

Work History
